Description

Thought about it a little bit, here's my proposal on ie deprecation:

RhodeCode 3.7 would be the last IE8 tested release.
RhodeCode 3.7+ we stop testing on IE8

RhodeCode 3.8 would be the last supporting IE9
RhodeCode 3.8+ we would stop testing on IE9

TBD: do we simply stop testing, on clean up IE specific hacks ?

As of 3.7+ and 3.8+ we need a dedicated page about not supported browser to display to users that use older browsers. Why ? We have twice issue that users did use ie11, but they had IE7/8 rendering engine enabled. We should be explicit about detecting older IE and listing what we actually support

History

#1 - 12.01.2016 15:46 - Marcin Kuzminski [staff]

Since IE10 is also deprecated.

A new extensions to the ticket should be made

RhodeCode 3.9+ we should stop testing IE10

#2 - 16.03.2016 15:48 - Marcin Kuzminski [staff]

- Private changed from No to Yes

#3 - 06.07.2016 12:04 - Marcin Kuzminski [staff]

- Private changed from Yes to No

#4 - 06.07.2016 12:04 - Marcin Kuzminski [staff]

- Status changed from New to Resolved
