

RhodeCode CE/EE - Bug #4089

svn repository does not exist

13.07.2016 16:43 - Robbie Gott

Status: Resolved	Start date: 13.07.2016
Priority: Normal	Due date:
Assignee:	% Done: 0%
Category:	Estimated time: 0.00 hour
Target version: v4.2	Spent time: 0.00 hour
Sorting:	Affected Version:
Commit Number:	

Description

command run from the windows client side is:
svn checkout <http://10.240.0.100/blah>

output
svn: E170000: URL '<http://10.240.0.100/blah>' doesn't exist

Attached is the server output after the command above

Note: the repository blah is shown in the interface as a repository with no folder structure and is shown on the server side with general svn structure.

Also Note: the repository is a **svn** repository but shows in the logs that "No git repository was found"

History

#1 - 18.07.2016 21:10 - Marcin Kuzminski [CTO]

We have investigated this issue and found that latest changes in SVN protocol 1.9 can break our system.

Currently we tested RhodeCode with SVN 1.7 and 1.8. and those two version are officially supported. We however spent some time to investigate the new protocol, and i think we made a patch to support 1.9 version.

Could it be possible to test it with your clients ?
