

RhodeCode CE/EE - Bug #4166

[ce] Rhodocode crashing after MySQL error

11.08.2016 13:39 - Mihai Nica

Status:	Resolved	Start date:	12.08.2016
Priority:	Urgent	Due date:	
Assignee:		% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:	v4.3	Spent time:	0.00 hour
Sorting:		Affected Version:	
Commit Number:			

Description

Rhodocode Enterprise crashes with a MySQL error after a while.
Already checked the pool_recycle, and it's set.
Celery is not enabled.

Here is the information in the error log:

```
2016-08-11 08:48:37.672 ERROR [rhodocode.lib.caches] Failed to commit on cache key update

```

And MySQL 5.5 on Ubuntu Linux 14.04.

Subtasks:

Bug # 4173: [ce, ee] mysql recycle pool timeout not working

Resolved

History

#1 - 12.08.2016 12:04 - Marcin Kuzminski [CTO]

- Target version set to v4.4

We put a special code for concurrency problem we found here:

<https://code.rhocode.com/rhocode-enterprise-ce/files/bf576ea02764f8fca47a4c14d81dceffe9b1cd83/rhocode/lib/caches.py#L217>

It might happen on concurrent pushes that cache invalidation was already set, thus in this case we don't care much on the IntegrityError. However the error above could potentially indicate that there's a other problem happening.

{{rum(66, Mihai Nica)}} is there a way to reproduce this issue somehow on your side ?

- maybe there are relevant bits in logs that would help us isolate it ?
- are there any errors on mysql side ?

One possibility is that we should catch: StatementError together with IntegrityError

#2 - 13.08.2016 02:04 - Redmine Integration

pullrequest created, <https://internal-code.rhodecode.com/rhodecode-enterprise-ce/pull-request/2563>, (status: under_review)

#3 - 16.08.2016 00:52 - Redmine Integration

pullrequest created, <https://internal-code.rhodecode.com/rhodecode-enterprise-ce/pull-request/2569>, (status: under_review)

#4 - 16.08.2016 20:12 - Marcin Kuzminski [CTO]

{{rum(45, Daniel D)}} did we test for the case of db crash that the new session cleanups works around this issue ?

#5 - 16.08.2016 20:17 - Marcin Kuzminski [CTO]

- Status changed from New to In Progress

#6 - 16.08.2016 22:02 - Redmine Integration

Commit <https://internal-code.rhodecode.com/rhodecode-enterprise-ce/changeset/d3c760652e972e4712de97e05a2b963534c834fb> references this issue

#7 - 16.08.2016 22:02 - Redmine Integration

pullrequest merged, <https://internal-code.rhodecode.com/rhodecode-enterprise-ce/pull-request/2569>, (status: approved)

#8 - 17.08.2016 04:21 - Daniel D

Apart from the expected error message when the db is down, Rhodecode will connect as normal once the db is up again.

#9 - 17.08.2016 11:09 - Mihai Nica

I didn't manage to find a way to reproduce the problem.
As for MySQL specific errors, didn't see any.

As for the log contents, this is error trace I get once the app crashes (all the requests before were successful).

#10 - 23.08.2016 23:35 - Marcin Kuzminski [CTO]

- *Target version changed from v4.4 to v4.3*

- *Status changed from In Progress to Resolved*

We released 4.3.1 which should address this issue, and recycle RhodeCode connections properly
