

## RhodeCode CE/EE - Bug #4208

### [ce, ee] test errors get hidden by error page

30.08.2016 18:42 - Daniel D

#### Description

When running tests the traceback is excepted away by the error handler page, this makes it difficult to debug since eg

```
app.get('/page_that_errors')
```

will return a 500 error page instead of a traceback.

OTOH making tests always raise errors will then break the page that checks if the pretty error page is working as it should.

Need to add a dynamic setting, eg settings['use\_error\_document'] = False - that can be turned on/off at will and will disable the pretty error page handler for running tests.

Commit <https://internal-code.rhodecode.com/rhodecode-enterprise-ce/changeset/aaa85268f1d2f6b2dc9a562115465de4fc0080de> changed this issue

##### #4 - 02.09.2016 09:15 - Redmine Integration

pullrequest merged, <https://internal-code.rhodecode.com/rhodecode-enterprise-ce/pull-request/2622>, (status: approved)

##### #5 - 14.09.2016 12:00 - Daniel D

- Status changed from Resolved to Feedback

Reopening this as it seems tests on pyramid views, specifically seen in the integration views tests, exhibit the behaviour still - a work around to get tracebacks when running py.test is to set pyramid.includes = pyramid\_debugtoolbar in test.ini but this will break the error page test.
