#### Description

Some feedback via Slack:

Some minor feedback points on <https://docs.rhodecode.com/RhodeCode-Control/tasks/switch-editions.html> ...

1. Works great! Auto-upgrade on the linked page is magic
2. It's not clear for a n00b like me how to remove the old instance
3. Because the old instance isn't stopped during the switch, another port has to be selected with the proxying webserver reconfigured. There might be a way to do this better then?
