Target version:	v4.5	Spent time:	0.00 hour
Sorting:		Affected Version:	
Commit Number:			
Description			
I set up a webhook for TeamCity with the following request on "hg push events" for one repository. http://server:port/httpAuth/action.html?add2Queue=ourBuildId I tried, it triggered a build on TeamCity but I can't access any more to integrations page in settings menu of this repository. Our Rhodecode version is 4.4.1 Enterprise Edition.			

History

#1 - 06.10.2016 01:03 - Marcin Kuzminski [CTO]

Hi Alexis,

could you check in logs what exception details are shown in there?

Cheers

#3 - 06.10.2016 01:10 - Marcin Kuzminski [CTO]

Hi,

there are no error here, is this the log from the time when you see the exception 500 ?

#4 - 06.10.2016 01:14 - Alexis Jeandet

Hi,

Yes I do a "tail .rcontrol/enterprise-2/enterprise.log" right after refreshing integrations page.
In VCS server I also don't get error.

#5 - 06.10.2016 10:28 - Marcin Kuzminski [CTO]

{{rum(45, Daniel D)}} any idea why the error could be suppressed ?

#6 - 06.10.2016 10:29 - Marcin Kuzminski [CTO]

- Target version set to v4.5

#7 - 06.10.2016 15:59 - Daniel D

No idea if there is no exception but a 500 is displayed?

Is it the grey 500 page with rhodecode logo or different 500 page?

#8 - 06.10.2016 16:09 - Alexis Jeandet

- File *RhodecodeIntegration.png* added

Yes,

here is the screenshot *RhodecodeIntegration.png*

#9 - 06.10.2016 16:13 - Daniel D

I will investigate - it might be an issue with the url routing - could you try moving this repository to root level ie. accessible at <http://rhodecode/QCdf> and see if it opens?

#10 - 06.10.2016 16:29 - Alexis Jeandet

I've just tried, it didn't change anything BUT when I connect as server admin it works, while my account is owner of the repo can't access to this page.

#11 - 06.10.2016 16:46 - Daniel D

Okay so a repo owner can't access the page, but the global admin can. This should be enough to find the bug. Thanks for the report.

#12 - 06.10.2016 16:49 - Alexis Jeandet

Even better if I directly connect to <https://hephaistos.lpp.polytechnique.fr/rhodecode/QCdf/settings/integrations/webhook/2> with own account it works but not <https://hephaistos.lpp.polytechnique.fr/rhodecode/QCdf/settings/integrations>. So it seem that only Integrations page has this bug.

- Status changed from *New* to *Resolved*

Commit 839758185a0f by Daniel Dourvaris daniel@rhodecode.com on default branch changed this issue. <https://internal-code.rhodecode.com/rhodecode-enterprise-ce/changeset/839758185a0fc671265bd778c7da8306541f707d>

#15 - 06.10.2016 17:44 - Redmine Integration

pullrequest merged by marcink (status: approved). <https://internal-code.rhodecode.com/rhodecode-enterprise-ce/pull-request/2775>

#16 - 06.10.2016 17:45 - Marcin Kuzminski [CTO]

Alexis,

Here's the small fix if you wish to apply it to your instance: <https://code.rhodecode.com/rhodecode-enterprise-ce/changeset/839758185a0fc671265bd778c7da8306541f707d>

#17 - 06.10.2016 23:02 - Alexis Jeandet

I applied the patch and it works, thanks guys! The fix was really fast.

Best regards,
Alexis.
