Description

I noticed that the system info page (http://localhost:5000/_admin/settings/system) does not work correctly on safari. If i open it, the whole "System Info" container is empty.
Looks like also the full text serach page is affected (http://localhost:5000/_admin/settings/search)

Tested on:

- OSX 10.11.6 (15G31)
- Safari Version 9.1.2 (11601.7.7)
- RhodeCode CE
