### Description

## Description

If i click the save button on the issue tracker settings page without having any pattern added and no pattern already in the list it leads to an exception.

If i add a pattern or if there is at least one pattern already present it works fine.

## Steps to reproduce

1. Open the page [http://localhost:5000/\\_admin/settings/issue-tracker](http://localhost:5000/_admin/settings/issue-tracker) (adapt to your host)
2. Make sure that no pattern is in the list and don't add one.
3. Click the save button
4. Exception happens

## Traceback

```
2016-10-14 12:01:34.209 ERROR [rhodecode.lib.middleware.error_handling] 'NoneType' object has no attribute 'getitem'
