Description			
Based on https://bitbucket.org/marcinkuzminski/rhodecode/issues/621/meta-tagging-could-be-excluded-from-limit			
I've just tried the meta-tagging to add a link to the bug trackers (Trac installs) for my projects, but the meta-tags are counted as part of the character limit for printing the summary on the front page. It would be nice if the meta-tags were somehow excluded from the summary so that you could get the ~60 characters of summary plus some tags.
