Description

Hello!

I have installed 4.5.1 Community edition on Ubuntu server 16.04. In admin/Settings/System info RhodeCode shows free inodes incorrectly. The number of free inodes reported by df -i is shown by RhodeCode as a number of used inodes.

For my disk where only 2% of inodes are used RhodeCode displays a warning "Critical: your disk free inodes are very low"

We got similar reports, we'll fix it in the next bugfix release. Thanks for reporting !

#2 - 13.12.2016 21:11 - Marcin Kuzminski [CTO]

- Target version changed from v4.5 to v4.6

#3 - 13.12.2016 22:41 - Marcin Kuzminski [CTO]

- Status changed from Confirmed to Resolved

push has been fixed into source code.
