Description

Somehow similar to user profile e.g https://code.rhodecode.com/_profiles/marcink but for usergroups.

- expose a view that shows an usergroup with members, really simple
- the view checks usergroup permissions(view at least read required)
- we need similar helper as for users which will expose a link to the usergroup profile

#2 - 28.08.2017 22:17 - Marcin Kuzminski [staff]

it should look similar to user profile, simple display of name, and members.

proposed url is /_profile_user_group/USER_GROUP_NAME
