<b>Description</b>			
<p>On Mercurial each branches create a new head and a new opened branch. When we use pull request, we merge it at the end by Rhodecode, but that doesn't close the branch.</p> <p>Following the Mercurial recommandation, we need to close the branch before merging, see <a href="https://barahilia.github.io/blog/computers/2014/10/09/hg-pull-via-http-fails-400.html">https://barahilia.github.io/blog/computers/2014/10/09/hg-pull-via-http-fails-400.html</a> for more informations.</p>
