Description

Email integration sends the messages with invalid links to changesets

Example invalid link from message:

```
<a href="None">11b1fb66dcf6</a>
```

History

#1 - 02.09.2017 09:45 - Vasiliy S

Example:

```
<a href="None">11b1fb66dcf6</a>
```

#2 - 02.09.2017 14:59 - Marcin Kuzminski [CTO]

I believe this was fixed in 4.9 release. Could you please upgrade ? Also 4.9 contains very important security fix for GIT, SVN and Mercurial.
