

RhodeCode CE/EE - Bug #5460

Repo creation stuck when remote clone returns partial http code 500

10.04.2018 15:45 - Peter Colledge

Status:	New	Start date:	10.04.2018
Priority:	Low	Due date:	
Assignee:		% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:		Spent time:	0.00 hour
Sorting:		Affected Version:	v4.11
Commit Number:			
Description			
UI stuck on 'Creating repository myrepo' Repository "myrepo" is being created, you will be redirected when this process is finished.'			
Steps to reproduce:			
<ol style="list-style-type: none">1. Create a hg repo with open permissions except one file, eg. .hg/store/data/foo.txt, which hgweb service does not have access to. This will cause getbundle to fail.2. Publish the repo with hgweb.3. Create new repo in RhodeCode and 'Clone from:' the hgweb url.4. Save. Observe stuck UI.5. Observe hgweb accesslog returning http code 200 for cmd=lookup, cmd=capabilities, cmd=listkeys, etc, but 500 on cmd=getbundle6. Observe backend http exceptions, attached.			
Note: Celery feature enabled.

#1 - 10.04.2018 17:51 - Marcin Kuzminski [staff]

Hi,

Thanks for reporting this. We don't have any timeouts on this process so it waits until a flag is changed finishing the process. It's due to fact that remote import can take multiple hours.

we'll try to check if it's possible to catch such errors and set the flag as failed.

#2 - 12.04.2018 10:09 - Peter Colledge

- File *rhodecode-createrepo-bad-stream.txt* added

Another exception with same effect, for reference.

RepositoryError: stream ended unexpectedly (got 143318 bytes, expected 179216)

#3 - 06.07.2018 19:14 - Marcin Kuzminski [staff]

we're struggling with catch those exceptions in HG, i guess this should be handled by end users, and delete re-create a repo
