Fonts can be improved, fixed width fonts need to be used for code snippets and not regular fonts. Syntax can be more appealing as well.

- Status changed from New to In Progress

This should be resolved once we deploy fonts update.

Can you paste the new screenshot of this repo please? https://github.com/AlexAltea/unicorn.js

#4 - 09.11.2018 00:21 - Arun Chandrasekaran

The current changes look better. Few more improvements can be done:

1. Rendering of bullets and numbering can be improved.
2. Remove "!imporant" attributes from CSS. It prevents the users from overriding via custom headers.
3. Optionally, bigger font size in the Markdown output when compared to the rest of the screen. That will make the docs easier to read. At present the font-size in the markdown output is small than the rest of the screen. It makes the UI look inconsistent.

See the current UI: QjW98T0.png

GitHub flavoured Markdown has issues with rendering.

This

```
- [x] status1
- [ ] status2
```

turns into this:

The new markdown renderer in 4.17.2 is very nice. However it still got some issues.

The following pre snippet doesn't get rendered properly.

```
The resulting tree structure will look like this:
```

```
    ```
    C:\DevEnv\libcurl>tree /F
    Folder PATH listing for volume Windows
    Volume serial number is 484C-4035
    C:.
    ├───bin
    │   curl.exe
    │   libcurl.dll
    │
    ├───include
    │   └───curl
    │   curl.h
    │   curlver.h
    │   easy.h
    │   mprintf.h
    │   multi.h
    │   stdcheaders.h
    │   system.h
    │   typecheck-gcc.h
    │
    └───lib
            libcurl.dll
            libcurl.exp
            libcurl.lib
            libcurl.pdb
    ```
```
