Description

For example, if I provide a mapping file with

```
[__DEFAULT__]  
repo_limit = 1
```

I still get an unlimited limit, which is the default CLI param, until I explicitly use the CLI param rhodecode-index... --repo-limit 1

See parse_opts in rhodecode_tools/commands/index.py

Version 756dd5c2d0b6 (v1.1.0) of cloned+venv'ed rhodecode-tools-ce.

History

#1 - 17.07.2020 17:36 - Systems Administration

This is still true while using version "4.18.2 Community".
