Target version:	Commit Number:
Sorting:	
Description	
<p>The JSON response of <code>get_pull_request</code> does not include the version number of the pull request (the one that gets incremented when a PR is updated with new commits). It would be a useful information to report in my use case (writing a bot that acts as a PR reviewer for TeamCity builds).</p> <p>Using the Python api, I can find the version number with this code, but there is no workaround when working with the HTTP API.</p> <pre>pr = PullRequest.get(pr_id) pr_version = pr.versions.count() + 1</pre>
