<b>Description</b>			
<p>Would like the ability to change the default landing page for a repository. In our team, we would prefer to see the Files view by default instead of the Summary view. I know that we can add bookmarks to individual repositories but we have several hundred repositories and so would like a way to see the Files from the base url.</p> <p>Example <a href="https://XXXX/playground/testrepo">https://XXXX/playground/testrepo</a> would show the files instead of the commits</p> <p>RhodeCode Enterprise 4.18.2 Community Edition</p>
