Description			
As an enhancement, it would make the search results easier to navigate visually if the matching search terms are highlighted in the code search results.

Hi Luke,

For Elasticsearch advanced search backend highlighting is enabled, please check for example here:

https://code.rhodecode.com/_admin/search?q=TODO&type=content

#2 - 27.03.2020 19:50 - Luke Mauldin

Yes, this is what I was looking for. Feel free to close this enhancement request as I see it is only supported in Elasticsearch.
