**Description**

Encountered error when using a smultiple search terms and navigating to the second page.

Scenario:

1. Search for: FromError AND extension:go --- the url generated is:  
`httpsXXXXcom/_admin/search?q=FromError+AND+extension%3Ago&type=content&max_lines`
2. Navigate to the second page of the results. =10The search query is changed in the search box to be:  
`FromError%20AND%20extension%3Ago` and the generated url is:  
`httpsXXXXXcom/_admin/search?q=FromError%2520AND%2520extension%253Ago&max_lines=10&sort=desc%3Adate&type=content&pag`

It looks like the application is trying to encode the spaces in the URL but it is not working as expected.e=2
