Description

In a pull request, each chunk has a standard diff header.

```
@@ -37,7 +37,7
```

For Git repositories, this header can also give the context of the chunk, which is nice.

```
@@ -37,7 +37,7 @@ MechanisticOpProperties::getSimultaneous
```

But I don't see the same for Hg repositories. On the CLI, this info can be added with the `--show-function` argument of `hg diff`.

#2 - 14.04.2020 22:53 - Daniel D

Thank you for bringing that back, we simply enabled that option for Mercurial Diffs to make them more consistent with GIT ones. Please note that diffs are often cached, and it might be that older ones wouldn't show that after the change. You can wait for the next release, or simply patch your vcserver with this simple change to obtain it now.

#3 - 23.04.2020 13:43 - Olivier Renaud

Awesome, thanks!
