

## RhodeCode CE/EE - Bug #5622

### Upgrade from 4.18.3 to 4.19.3 broke all PRs

15.06.2020 20:58 - Sebastian Elsner

<b>Status:</b>	Resolved	<b>Start date:</b>	15.06.2020
<b>Priority:</b>	High	<b>Due date:</b>	
<b>Assignee:</b>		<b>% Done:</b>	0%
<b>Category:</b>		<b>Estimated time:</b>	0.00 hour
<b>Target version:</b>		<b>Spent time:</b>	0.00 hour
<b>Sorting:</b>		<b>Affected Version:</b>	
<b>Commit Number:</b>			
<b>Description</b>			
After the upgrade I get a Server Error 500 and basically identical tracebacks looking like this. I reverted the container back afterwards.

## History

### #1 - 15.06.2020 21:03 - Marcin Kuzminski [CTO]

- Status changed from New to In Progress

- Priority changed from Normal to High

Hi,

Does the pull request open, or it's raising the 500 error? If it opens, please try force update.

If it fails to open, could you try to update the PR using the API ?

We assume new PRs work ok?

### #2 - 16.06.2020 14:15 - Sebastian Elsner

The PR does not open, it raises 500.

New PRs seem to work

I cannot get the force update working, I have not used the API before

```

  File "/opt/rhodecode/store/wz9gh57g4zk6aklc1b6d996150az2kkx-python2.7-requests-2.22.0/lib/python2.7/site-packages/requests/adapters.py", line 514, in send
    raise SSLError(e, request=request)
SSLError: HTTPSConnectionPool(host='10.10.11.249', port=10020): Max retries exceeded with url: /_admin/api (Caused by SSLError(SSLEOFError(8, u'EOF occurred in violation of protocol (_ssl.c:726)'),))
```

I have googled the error, but got stuck at "its a python bug" or "your ssl is not on" (which it is). Do you have an idea?

### #3 - 16.06.2020 14:46 - Marcin Kuzminski [CTO]

If you connect directly to the 10020 port you cannot use HTTPS, simply do HTTP call to that IP.

Also, could you provide a full detailed logs, and exception logged into the logs for reference ?

We have to investigate this issue in depth, since we cannot reproduce this on our set of 100s of test PRs we used to validate the 4.19.X changes.

#### #4 - 16.06.2020 18:40 - Sebastian Elsner

- File *community.log.tar.gz* added

Updating PR with "update\_commits" via the API works, so that is a workaround.

We have a very basic installation, Database ist SQLite, no fancy settings or workflows.

I attached the logs of community-1. Oldest entry is 2 days ago. In the middle there is some fuzz about the host not being found, this is because I worked on clone of the container rhode is running in and the IP of that clone changed, so there are errors until I fixed the ".ini"s of rhode. Pls ignore. Migration was done this morning, the 16th, you can see the startup in the logs.

#### #5 - 22.07.2020 00:47 - Redmine Integration

- Status changed from *In Progress* to *Resolved*

Commit 96b3ab254a3b by Marcin Kuzminski [marcin@rhodecode.com](mailto:marcin@rhodecode.com) on stable branch changed this issue.

<https://code.rhodecode.com/rhodecode-enterprise-ce/changeset/96b3ab254a3bbfcf7d3e9b9bcd3e2bc920232cb9a>

#### #6 - 28.07.2020 16:44 - Sebastian Elsner

Thank you for the "workaround fix" in the last release :)
