

## RhodeCode CE/EE - Bug #5630

### Inline comments do not follow the line of code

20.07.2020 16:35 - Olivier Renaud

#### Description

It seems to me that inline comments are attached to a specific line number, instead of a specific line of code. I commented inline on a PR, and the PR was updated in the meantime with insertions/deletions in other parts of the file. Now, my inline comment is 10 lines below the line of code the comment was about. I have a bunch of comments that don't make sense anymore, because they are not in the expected location.

This considerably reduces the usefulness of inline comments.

#### History

##### #1 - 20.07.2020 17:13 - Olivier Renaud

On a related note, I have an inline comment on a line that was later removed by a PR update. The comment is still there on an unrelated line, making things confusing. The comment was "please remove the slashes here".

##### #2 - 20.07.2020 23:01 - Daniel D

Hi,

Do you have enabled the Invalidate and relocate inline comments during update option ?

##### #3 - 21.07.2020 11:25 - Olivier Renaud

Oh right, I remember I changed this setting a long time ago. I remember I was not happy with its behavior, but I forgot the reason. I'll enable it again and see how it behaves. You can close this issue, thanks.
