Description			
<p>Hey,</p> <p>great feature addition with the draft comments! Much appreciated! I think the UX would be better if either:</p> <p>a) all buttons would have an icon AND a text b) all buttons would have only text</p> <p>I could only "guess" what the new (x) button would do. I would name it "Dismiss".</p> <p>Additionally</p> <p>"Add draft" is with it's yellow quite hard to read with yellow outline on white background. Maybe go from "btn-warning" to "btn-secondary".</p>
