

RhodeCode CE/EE - Feature #5642

pull request version column in commit list

02.12.2020 10:22 - Sebastian Elsner

Status:	Resolved	Start date:	02.12.2020
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:		Spent time:	0.00 hour
Sorting:		Commit Number:	
Description			
As a reviewer I often find myself checking single commits between two versions of a PR. Normally I would click "show versions" and then do a diff between the PR versions. Sometimes this gives undesirable results, e.g. when a branch with other major changes was merged into the PR. So I check each commit separately. In this case it would be a productivity boost to see the version annotated in the commits table like below.

History

#1 - 02.12.2020 23:50 - Marcin Kuzminski [CTO]

Visually this would be challenging, especially when you squash, reorder, or force push commits.

That said each PR version has already stored list of full commits, so we can do some interesting calculations there. Nice idea, we'll add this.

#2 - 29.12.2020 07:49 - Marcin Kuzminski [CTO]

- Status changed from New to In Progress

#3 - 30.04.2021 08:53 - Redmine Integration

- Status changed from In Progress to Resolved

Commit ca0827b2292e by Milka Kuzminski milka@rhodecode.com on default branch changed this issue.
