Description

As a reviewer I receive email notifications about comments on PRs I am involved with. The emails contain links like "rcserver.com/repo/pull-request/700#comment-4456". Clicking the link opens Firefox. I expect FF to scroll to the comment's anchor.

It does not scroll to the comment. The PR is big and the files in the PR are collapsed. I click "Expand all files", I click FF's address bar, I press enter, FF scrolls to the comment.

It would be great if this would somehow work without me clicking on "Expand all files" first.
