Description

Hello,

We have one case concerning the PR, we have 2 PR cross each other like this:
PR 1 who merge branch "dev1" to "product1"
PR 2 who merge branch "dev2" to "product1"

On the PR 2 we have this message
"- This pull request cannot be merged because the target reference product1 is missing."

The user of PR2 have remove the PR1 and the message still present on PR2
He need to remove the PR2 and recreate a PR3

I don't know if this behavior is expected or not, and if we don't have a way not to be blocked and to redo the PRs

Thanks
