Target version: v4.27	Spent time: 0.00 hour
Sorting:	Affected Version: v4.26
Commit Number:	

Description

Setting a timezone different than UTC-0 causes inconsistencies in the displayed commit ages. In our case we use UTC-3. After a new commit, the last modified date is shown as if the commit was created 3 hours in the future. Also, creation dates of groups and repos are saved in 1/1/1970 (in our case UTC-3)

Last Change	Commit
Wed, 31 Dec 1969 21:00:00	No commits yet
Wed, 20 Apr 2022 14:03:49-03:00	r0:1
in 2 hours and 57 min	r2:3

When I enter in the repo details, the last modified date is shown in UTC-0, for example, showing "4 minutes and 14 seconds ago"

Wed, 20 Apr 2022 14:03:49+00:00
4 min and 14 sec ago
29 min and 5 sec ago
39 min and 22 sec ago
